

FileLens Pro

Smart File Search Pro for Windows - Complete User Manual

Official End-User Guide - Windows 10 & 11 (64-bit)

Chapter	Topic	What You Will Learn
1	Getting Started & Installation	Installing FileLens Pro via setup wizard & first drive scan
2	The Floating Search HUD (Alt + Space)	Instant search bar, navigation & live preview card
3	The 8 Search Modes	Partial, AI Natural Language, Exact, Fuzzy, Regex, etc.
4	Ask FileLens - Document AI (Ctrl + Q)	Summarizing PDFs, extracting key facts & conversational Q&A;
5	Multi-Document Folder Research (Ctrl + R)	Synthesizing insights & cross-file comparison tables
6	Deep Content Search & Document OCR	Searching inside PDFs, Word, Excel, scanned files & images
7	Hindi Typing & DevLys 010 Support	Devanagari keyboard, transliteration & font cycling
8	Instant Local Send (Wi-Fi QR Code)	Sharing files to iPhone & Android without cables
9	Inline Calculator & Unit Converter	Math, data storage, distance, temp & currency conversions
10	Action Palette & Quick-Launch Tray	Command menu (Ctrl + K), pinned files & recent items
11	Duplicate Cleanup & Windows Explorer	Safe duplicate file cleanup & right-click shell search
12	Keyboard Shortcuts Cheat Sheet	Every essential hotkey at a glance
13	License Activation & Troubleshooting	7-day trial, activating license key & common questions

Note: FileLens Pro operates 100% locally on your computer. Your files, documents, and search queries remain private on your machine.

Chapter 1: Getting Started & Installation

Welcome to **FileLens Pro**! Unlike standard Windows search, FileLens Pro indexes your drives in seconds, searches both filenames and full document text, performs automated OCR on scanned pictures, and offers an intelligent floating HUD accessible from anywhere on your PC.

Step-by-Step Installation Wizard:

1. Download the official installer: **FileLensProSetup.exe**.
2. Double-click **FileLensProSetup.exe** to launch the setup wizard.
3. Choose your preferred startup options:
 - **Create Desktop Shortcut:** Places a quick launcher on your desktop.
 - **Start FileLens Pro with Windows:** Highly recommended - keeps your index updated silently in the background so search is always instant.
 - **Launch Minimized to System Tray:** Keeps the app tidy in your notification area next to the clock.
4. Click **Install**, then **Finish**. FileLens Pro starts automatically.

First Launch & Drive Indexing:

When FileLens Pro opens for the first time, select the drives you want to search (such as **C:** and **D:**). Click **Start Index**. FileLens scans hundreds of thousands of files in just a few seconds. Once indexed, the built-in live monitor automatically updates the index whenever you create, edit, rename, or delete a file.

Tip: You do not need to manually re-index after the first setup. FileLens Pro detects file changes within 2 seconds.

Chapter 2: The Floating Search HUD (Alt + Space)

The **Floating Search HUD** is your primary everyday command center. It floats cleanly above whatever application you are working in.

How to Use the HUD:

- **Summon:** Press **Alt + Space** from anywhere in Windows (any app, document, or browser).
- **Type:** Start typing immediately - results appear with zero lag.
- **Navigate:** Use the **Up** and **Down** arrow keys to highlight results.
- **Open File:** Press **Enter** to launch the highlighted file in its default program.
- **Reveal in Explorer:** Press **Ctrl + Enter** to highlight the file directly inside its folder in Windows Explorer.
- **Dismiss:** Press **Esc** or click anywhere outside the window to close the HUD.

The Live Preview Card:

As you navigate through search results, a rich preview card automatically opens on the right side. It displays a thumbnail/preview, file size, last modified date, exact file path, and one-click action buttons: **Open**, **Reveal**, **Copy**, **Share**, and **Ask AI**.

Chapter 3: Mastering the 8 Search Modes

FileLens Pro features 8 specialized search algorithms. Switch between modes instantly by pressing **Tab**, **Ctrl + M**, or clicking the mode pill in the top bar:

Mode	How It Works	Example Query & Match
Partial (Default)	Matches any part of a word or path	inv 26 finds <i>invoice_2026.pdf</i>
Natural Language	Smart AI search; finds files by meaning & concept	client tax billing finds financial audits
Exact	Strict character-for-character phrase match	"NDA Agreement v2"
Whole Word	Matches complete words only, ignoring fragments	tax matches <i>tax</i> , not <i>taxonomy</i>
Fuzzy	Typo-tolerant search for misspelled filenames	dcmnt finds <i>document.docx</i>
Wildcard	Classic pattern search with * and ?	*.pdf or Q?_sales.*
Regex	Regular expression search for power users	^IMG_\d{4}\.(png jpg)\$
Boolean	Logical combinations with AND, OR, and NOT	contract AND NDA NOT draft

Chapter 4: "Ask FileLens" - Document AI Assistant (Ctrl + Q)

Turn any document on your computer into an interactive conversational assistant. You can read, summarize, and extract information from PDFs, Word files, spreadsheets, and text notes without reading through hundreds of pages.

How to Use Document AI:

1. Highlight any document in the search results list.
2. Press **Ctrl + Q** or click the **Ask AI** button on the preview card.
3. The Document Q&A; panel appears immediately.

1-Click Preset Actions:

- **Summarize:** Generates a concise executive summary of the entire file.
- **Key Facts:** Extracts critical dates, monetary amounts, deadlines, and key names into a neat bulleted list.
- **Action Items:** Automatically uncovers tasks, deliverables, and assignments mentioned in the document.

Ask Any Custom Question:

Type your question in natural English into the chat box and press **Enter**. For example: *"What are the payment terms mentioned in section 4?"* or *"Does this candidate have experience with Python?"*. Click **Copy Answer** to copy the response to your clipboard.

Chapter 5: Multi-Document & Folder Research (Ctrl + R)

When you need to analyze an entire folder, project directory, or collection of related files at once, use **Folder Research**.

How to Research a Folder:

1. Highlight any folder or multi-select files, then press **Ctrl + R** (or click **Research** in the toolbar).
2. FileLens Pro reads through all files in that folder across 25+ supported file formats.
3. Choose a research tool:
 - **Synthesize Findings:** Produces a consolidated report across all documents.
 - **Cross-Doc Comparison:** Builds side-by-side comparison tables comparing specs, metrics, or terms.
 - **Audit Inconsistencies:** Flags contradictory numbers, conflicting dates, or version mismatches.
 - **Grounded Citations:** Every insight includes a clickable link like [Source: invoice_aug.pdf] - click it to reveal the file immediately.
4. Click **Export Report** to save your findings as a clean Markdown or text file.

Chapter 6: Deep Content Search & Document OCR

FileLens Pro doesn't just search filenames - it reads **inside** your files to find matches anywhere in the text.

Supported Formats for Content Search:

- **PDFs:** Both digital text PDFs and scanned document pages.
- **Microsoft Office:** Word (.docx), Excel (.xlsx), PowerPoint (.pptx).
- **Plain Text & Code:** .txt, .csv, .json, .html, .py, .js, .md, .xml, .log, etc.
- **Archives:** .zip, .rar, .7z (searches inside compressed archives).

Automatic Optical Character Recognition (OCR):

When images (PNG, JPG, BMP, WebP, TIFF) or scanned receipts contain text, FileLens Pro automatically runs OCR in the background. Once processed, you can search for words printed inside the photos just like regular text documents!

Tip: OCR processes silently in the background without slowing down your PC. You can view progress in the OCR tab.

Chapter 7: Hindi Typing & DevLys 010 Support

FileLens Pro has industry-leading support for Indian languages, including Hindi Devanagari and government/court typewriter fonts.

Hindi Features:

- **On-Screen Devanagari Keyboard:** Click the Hindi icon to open an interactive on-screen keyboard.
- **Phonetic Transliteration:** Type Hindi words phonetically in English (e.g., *namaste*) and watch them automatically convert to Devanagari (■■■■■■■■).
- **DevLys 010 Font Support:** Full search support for legacy Hindi Remington typewriter text commonly used in government offices.
- **Quick Language Cycling:** Press **Ctrl + T** in the search box to cycle between: *English -> Hinglish Phonetic -> DevLys 010*.

Chapter 8: Instant Local Send - Wi-Fi QR Code Sharing

Transfer any file directly to an **iPhone**, **iPad**, or **Android** phone in seconds - no USB cables, no Bluetooth pairing, and no cloud uploads.

How to Transfer a File to Your Phone:

1. In search results, highlight the file you want to send.
2. Press **Ctrl + S** or click the **Share** button on the preview card.
3. A QR code window appears on your computer screen.
4. Open the **Camera app** on your phone and point it at the computer screen.
5. Tap the link that pops up on your phone. A mobile page will open:
 - Tap **Download File** to save it to your phone storage.
 - Or tap **Preview in Browser** to view photos, PDFs, or stream videos directly on your phone!

Note: Both your computer and your phone must be connected to the same local Wi-Fi router for direct transfer.

Chapter 9: Inline Calculator & Unit Converter

No need to open a separate calculator app. Simply type your math equations or conversion queries directly into the search bar (**Alt + Space**):

Supported Calculations & Conversions:

- **Math:** $144 * 12 \rightarrow 1,728$ | $(250 * 4) / 5 + \text{sqrt}(144) \rightarrow 212$ | $2^{10} \rightarrow 1,024$
- **Storage Units:** 500 MB to GB $\rightarrow 0.488 \text{ GB}$ | 2 TB to GB $\rightarrow 2,048 \text{ GB}$
- **Length & Distance:** 100 m to ft $\rightarrow 328.08 \text{ ft}$ | 5 miles to km $\rightarrow 8.05 \text{ km}$
- **Temperature:** 100 c to f $\rightarrow 212 \text{ F}$ | 72 f to c $\rightarrow 22.2 \text{ C}$
- **Currencies:** 100 USD to INR | 50 EUR to USD | 1000 JPY to GBP

Tip: When a calculation result appears at the top of the search list, press **Enter** or **Ctrl + C** to copy the answer to your clipboard!

Chapter 10: Action Palette & Quick-Launch Tray

FileLens Pro provides keyboard-first power tools to manage and organize your files efficiently.

Action Command Palette (Ctrl + K):

Highlight any file in the search list and press **Ctrl + K**. A quick menu opens showing all available actions: **Open File**, **Reveal in Explorer**, **Copy Full Path**, **Copy Filename**, **Instant Local Send**, **Ask AI**, **Pin/Unpin**, **Run as Administrator**, **Compute Checksum Hash**, and **Move to Recycle Bin**.

Pinned Items & Recent Files:

When you summon Floating Search (**Alt + Space**) and the search box is empty, the window displays your **Pinned Items** and **Recent Files**. Press **Ctrl + P** on any file to pin it for 1-click access anytime.

Chapter 11: Duplicate Cleanup & Windows Explorer

Duplicate File Cleanup:

Wasted disk space from duplicate files is easy to fix with FileLens Pro: click **Duplicates** on the sidebar or toolbar. FileLens scans your files and groups identical copies together. Review the files side-by-side and delete unwanted duplicates with one click. Deletions safely go to the **Windows Recycle Bin**, so you never have to worry about accidental loss.

Windows Explorer Right-Click Menu:

You can search inside any specific folder right from Windows Explorer: right-click any folder or external drive in Windows Explorer and select "**Search with FileLens Pro...**". The search HUD will open immediately pre-scoped to that directory.

Chapter 12: Keyboard Shortcuts Cheat Sheet

Keep this cheat sheet handy for maximum productivity:

Shortcut	Action Performed	Where Used
Alt + Space	Open / Summon Floating Search HUD	Global (Anywhere in Windows)
Esc	Close Floating Search HUD or dismiss dialogs	Search HUD
Enter	Open highlighted file / Copy calculation result	Search Results
Ctrl + Enter	Reveal & highlight file in Windows Explorer	Search Results
Ctrl + K	Open Action Command Palette (all power actions)	Search Results
Ctrl + Q	Launch "Ask FileLens" Document AI Q&A;	Search Results
Ctrl + R	Launch Multi-Doc / Folder Research	Search Results / Folder
Ctrl + S	Open Instant Local Send (Wi-Fi QR Code)	Search Results
Ctrl + C	Copy full file path to clipboard	Search Results
Ctrl + P	Toggle Pin / Unpin from Quick-Launch Tray	Search Results
Tab / Shift+Tab	Cycle search mode forward / backward	Search Bar
Ctrl + M	Cycle search mode	Search Bar
Ctrl + T	Cycle language: English -> Hinglish -> DevLys	Search Bar
Up / Down Arrows	Navigate search results (syncs preview card)	Search Results
Ctrl + 1 ... 9	Quickly launch item 1 through 9 directly	Search Results

Chapter 13: License Activation & Troubleshooting

7-Day Free Trial:

FileLens Pro comes with a **7-day free trial** with every single pro feature fully unlocked. No credit card is required - simply download and start using. When the trial ends, a prompt will remind you to enter your lifetime license key.

How to Activate Your License Key:

1. Open FileLens Pro and click **Settings** on the toolbar or sidebar.
2. Select the **License** tab.
3. Paste your serial key (format: FLPRO-XXXX-XXXX-XXXX-XXXX) into the box.
4. Click **Activate License**. Your lifetime license will activate immediately and permanently.

Frequently Asked Questions (FAQ):

Q: Does FileLens Pro work offline?

Yes! Core file search, content indexing, OCR, and calculator are 100% offline. No internet connection is needed to search your PC.

Q: Why won't my phone connect to the Wi-Fi QR Code link?

1. Ensure both your computer and phone are connected to the same Wi-Fi router.
2. If your phone uses 4G/5G mobile data alongside Wi-Fi, temporarily turn off mobile data so the phone looks on the local network.
3. If Windows Firewall blocks access, click **1-Click Fix** inside the Share window.

Q: How do I rebuild the search index if I move folders?

Open FileLens Pro -> click **Settings** -> **Indexing** -> click **Rebuild Index**.

Q: Need help or customer support?

Send an email anytime to filelenspro@gmail.com and our team will be happy to assist you.
